

## SN4 Combination Starters

The SN4 is a compact motor control solution designed for industrial and commercial applications. With integrated protection features, it ensures efficient and reliable motor operation while saving panel space. Easy installation and high-quality components make it a dependable choice for minimizing downtime.

ELECTRIC CONTROLS

### Applications:

- Damp, wet, dirty, dusty areas where ultimate corrosion and ingress protection is required
- Harsh motor control environments, including: refineries, chemical and petrochemical plants, corrosive process facilities, food and beverage, marine and mining
- Across-the-line starting, stopping, speed changing and reversing of polyphased AC induction motors

### Design Features:

- Available with solid-state electronic overload providing reliable, accurate and value-driven protection, including communication capabilities, while reducing inventory carrying costs with wide FLA adjustment (5:1) and selectable trip class. And Bi Metallic Thermal overloads.
- Adjustable bimetallic ambient compensated overload relays with interchangeable heater packs – available in three basic sizes, covering applications up to 600 HP
- Fixed heater overloads optional
- A full line of snap-on accessories – top and side mounted auxiliary contacts, solid-state and pneumatic timers
- Straight through wiring – line lugs at top, load lugs at bottom

- Horizontal or vertical mounting on upright panel for application freedom
- Screw type power terminals have captive, backed-out self-lifting pressure plates with ± screws for reduced wiring time
- Accessible terminals for easy wiring; optional finger-proof shields available to prevent electrical shock
- Top located coil terminals convenient and readily accessible.
- Designed to meet or exceed UL, IEC, VDE, BS and other international standards and listings

- 45 mm contactor magnet coils have three terminals, permitting either top or diagonal wiring – easy to replace European or U.S. style starters or contactors without changing wiring layout
- Encapsulated dual voltage/frequency magnet coils – permanently marked with voltage, frequency and part number

### Certifications

- Type Nema 1,12,3R,4,
- 4X, 4X non-metallic
- ABS Type Approved
- OSHPD Certified (OSP-0015-10)
- Certified Type 2 ordination
- NEMA starters are UL Certified to achieve IEC 947 Type 2 coordination against 100,000A short circuit fault currents
- cUL & UL Standard 508A \*

### Standard Materials:

- Enclosure, external hardware – 316 stainless steel & Painted Steel
- External latching hardware – chrome-plated steel
- Internal mounting plate – powder-coated steel
- Internal hardware – zinc-plated steel

\* Unless otherwise noted, this product(s) does not include UL Listing and is only built to the standards. UL Listing can be provided as an adder if requested. UL Listing either must be applied at the factory by Spike or by Spike and UL representative in the field

Combination  
Starters

### Electrical Ratings:

- Motor starters
  - Single, three-phase
  - 3-pole, non-reversing, full voltage
  - NEMA sizes 0-8
  - Up to 600 HP
- Circuit breakers
  - 3-pole, 600 VAC
  - 3A through 1200A
- Disconnect switches
  - 3-pole, 600VAC
  - 15A through 1200A
  - Fusible and non-fusible
- 100,000 rms short circuit rating (480V breakers, fused disconnects)

### Construction:

- Made in the USA
- Robotically applied seamless foam-in-place gasket helps assure high performance in environmental conditions.
- Enclosure and door are fabricated from (14) gauge steel
- All continuous welded seams are finished smooth
- Ground provisions provided on all doors, bodies and back panels.
- Door secured to body with robust continuous hinge for performance in all environments
- High strength powder coated, zinc die cast handle provides corrosion resistance Standard pad lockable handle trigger provides secondary security.

**Green Energy Efficient:** The SN4 Combination Starter by Spike Electric Controls is a green energy-efficient solution. Its precise motor control capabilities ensure that motors operate at optimal efficiency, reducing energy wastage. Additionally, it's designed with built-in protections, preventing motor overheating and related energy losses. By minimizing downtime and improving system performance, the SN4 contributes to overall energy efficiency, making it a sustainable choice for environmentally conscious applications.

## Example Part Number

### SN4 3 FTSP200 MCB WT 34 S780 A

#### Wiring System

3 - 3 Phase  
1 - Single Phase

#### Breaker voltage

2 - 240V  
4 - 480V  
6 - 600V

#### Motor Starter Accessories

Motor Starter Accessories	SUFFIX
Less overload relays (lighting contactor)	CL
Less overload relays (motor contactor)	CM
Starter w/ electronic ground fault overload relay	GF
Additional control contacts, N.O. or N.C	S780
Auxiliary contacts on starter 1 N.O. & 1 N.C	S781
Auxiliary contacts on starter 2 N.O. & 2 N.C	S782
Auxiliary contacts on starter 3 N.O. & 3 N.C	S783
Solid state overload relay	SSOL
BI Metallic overload relay	BI
Electronic thermal overload relay	ETOR

#### Enclosure Modifications & Accessories

#### Cat #

Control Circuit Transformer, 100VA for NEMA/EEMAC sizes 0-2, 600/480/240-120, 50 / 60 Hertz, with provision for fusing both primary leads and one secondary lead (fuses not provided)	FTPS100
Control Circuit Transformer, 200VA for NEMA/EEMAC size 3, 600/480/240-120, 50 / 60 Hertz, with provision for fusing both primary leads and one secondary lead (fuses not provided).	FTPS200
Control Circuit Transformer, 300VA for NEMA/EEMAC size 4, 5 600/480/240-120, 50 / 60 Hertz, with provision for fusing both primary leads and one secondary lead (fuses not provided)	FTPS300
Control Circuit Transformer, 500VA for NEMA/EEMAC 600/480/240-120, 50 / 60 Hertz, with provision for fusing both primary leads and one secondary lead (fuses not provided)	FTPS500

## Legend Plates:

If desired markings on indicating plates may be added to catalog number after the coil voltage designation. Put a – after the coil voltage & any legend plates that are selected. Select from the list of standard markings below.

### Single Function Legend Plates

MARKING	CAT. #
Automatic	DSL16
Blank	DSL01
Blank with single field	DSL02
Close	DSL21
Down	DSL23
Emerg. Stop	DSL17
Fast	DSL46
Forward	DSL18
Hand	DSL15
In	DSL24
Jog	DSL10
Lower	DSL27
On	DSL07
Off	DSL08
Open	DSL20
Out	DSL25
Power On	DSL14
Raise	DSL26
Reset	DSL12
Reverse	DSL19
Run	DSL09
Safe	DSL85
Slow	DSL47
Start	DSL05
Stop	DSL06
Test	DSL13
Trip	DSL11
Up	DSL22

### Two Function Legend Plates

MARKING	CAT. #
Blank with 2 fields	DSL03
For –Rev	DSL30
Hand-Auto	DSL29
In-Out	DSL35
Off-On	DSL48
Open-Close	DSL32
Raise Lower	DSL36
Run-Jog	DSL28
Safe-Run	DSL86
Start-Stop	DSL37
